

Real Wood Transformed

The New Standard is Americana™

Are you searching for an Eco-friendly, low-maintenance hardwood solution? Americana is the answer. **Americana is Thermally Modified hardwood that offers:**

- Gold standard hardwood
- 100% Made in the USA
- Simple maintenance
- A 25+ year lifespan
- Ease of installation
- High weather resistance

SUPERIOR DURABILITY
Class 1 durability
25+ year lifespan

FIRE RESISTANT
Class B Fire Rating

INSECT RESISTANT
Rated GOOD for Insect Resistance

HARDWOOD TOUGH
Hardwood Janka rating of 1400

LIGHTER WEIGHT
Only 40 pounds per cubic foot

The Americana™ Edge

Americana is 100% made in the USA.

As a vertically-integrated Pennsylvania manufacturer, we can harvest, design, cut, thermally-modify and distribute gold standard hardwoods in the most efficient and time effective manner.

No chemicals. No threat to rainforest ecosystems.

Our entire production process is chemical free. We use pure, natural hardwoods - no oil, plastic, resin, wax or other additives. Americana is a healthy, local alternative to tropical rainforest wood products.

Proven performance in the field.

Our thermal-modification process uses heat and steam to fundamentally transform the wood. As a result, it retains an equilibrium moisture content of 3-4 percent - making it resistant to rot, decay and termites.

Low maintenance.

Allow the wood to age naturally to a striking silver, or apply a UV protectant to preserve the exotic brown color. You're welcome to stain it to achieve the color you want, but it's not necessary.
